ADVANCED CHEMICAL PEELS .

Our Advanced Chemical Peels Short Course is designed for students transitioning from a beauty therapy or nursing background into the exciting world of dermal therapies, and for students wanting to introduce Chemical Peels into their business.

Facilitated by our experienced and qualified Dermal Educators, this course has been tailor made to give you the required in-depth knowledge and skills to confidently and safely perform advanced chemical peels within a clinical setting.

Theoretically, you will gain an understanding of cosmeceutical science and managing tissue and cell response. Our trainers will further guide you with all the tools necessary to provide an effective client consultation and clinical experience.

The practical training is considered a key element to your course. Using a leading cosmeceutical brand, you will perform a variety of advanced chemical peel treatments focusing on the industry's most current peel formulations to treat conditions such as acne, pigmentation, and accelerated aging.

You will perform intensive 'hands on' advanced chemical peel treatments with real clients, experiencing real industry expectations of a clinical environment at our industry leading facility.

COURSE DETAILS .
