COSMETIC LIGHT BASED THERAPIES FOR SUPERFICIAL VASCULAR LESIONS .

Qualified laser technicians who have been trained in advanced medical grade procedures are highly sought after in the industry.

The Cosmetic Light Based Therapies for Superficial Vascular Lesions course is designed to build on your current foundation of laser knowledge and increase your skillset. Encompassing crucial theoretical and practical components, your learnings include in-depth client consultation, assessment, treatment plans and client education. Simulating a clinical environment, your 'hands on' training includes real clients of all different skin types with real concerns including spider veins and cherry angiomas.

We offer the benefit of conducting your required 50 supervised hours of practical training in the simulated clinic environment at our Academy. This then provides the benchmark to apply for a Full Use Licence for Superficial Capillary Reduction.

Strict regulatory guidelines exist in Queensland and Western Australia. Our trainers are licenced through QLD Radiation Health and also WA Radiological Council.

COURSE DETAILS .

COURSE PRICE
\$3,500

COURSE DURATION
Onsite practical: 8-days (equivalent to 50 logged hours)

COURSE EXPIRATION
12 months
